What is the cost of IBR's drilled shafts?

Based on Hood River and Abernathy Bridge estimates, IBR's 96 bridge shafts could soar to \$768 million, \$8.0 million/shaft. This is much more than IBR's \$500 million estimated TOTAL COST for a bridge in IBR's Draft Supplemental EIS.

Drilled Shafts **\$377 million**

Shafts 48

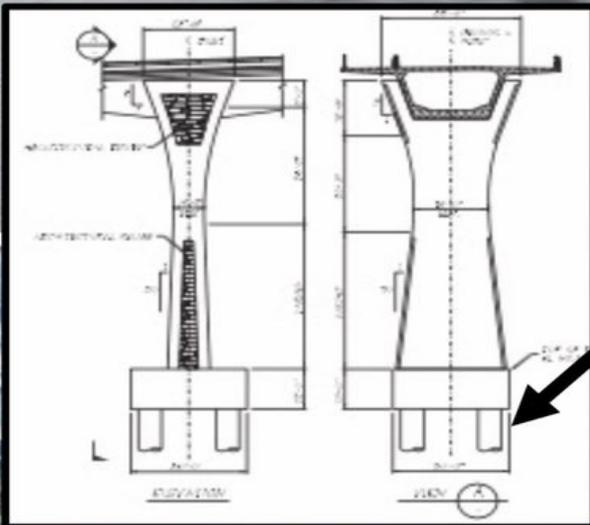

Cost/shaft **\$7.8 million**

Hood River Bridge
Total Cost \$1,120 million

Drilled Shafts **\$250 million**

Shafts 28

Cost/shaft **\$8.9 million**

Drilled Shafts **\$768 million**
Shafts 96
Cost/shaft **\$8.0 million**

Abernathy Bridge
Total Cost \$750 million
